

MORE THAN ONE GIGAWATT OF EXPERIENCE

CHECK UP YOUR PLANT
INDUSTRIAL APPLICATION

MORONI & PARTNERS

www.checkupyourplant.it

The services included in “Check Up Your Plant” package allow the investor to analyze, monitor and optimize the energy demand of the company.

1 ENERGY SUPPLY CONTRACT ANALYSIS

UNDERSTAND YOUR ENERGY CONSUMPTION

M&P performs an **analysis of the energy supply contracts and of the main specific consumption parameters** (hourly, daily, weekly, monthly and annually) underlining the influence of the cost profile over the consumption curve.

This analysis verifies and recognizes the inefficiencies detected in the management or during plant operation, in order to optimize your company consumptions and costs.

The check-up of the properness of the current energy supply contract is performed.

2 ENERGY AUDIT

INSPECT YOUR PLANTS

M&P **focuses and assays the energy demand of your company**, evaluating the distribution of electric, thermal and cooling consumption and the processes type and management.

M&P performs **energy audits, surveys and customized analyses** that allow to:

- Develop an energy evaluation over the main consumption areas
- Identify the most energy intensive devices
- Develop customized models for consumption forecasting
- Build up an energy baseline
- Set an energy account

Based on the results, **M&P will recommend energy saving solutions** in order to reduce cost and energy usage.

3 ASSISTANCE FOR ISO 50001 CERTIFICATION

IMPROVE THE ENERGY PERFORMANCE
OF YOUR COMPANY

M&P helps you in the **Energy Management System (EMS) implementation, in compliance with the UNI EN ISO 50001**, setting targets and benchmarks in order to reduce energy usage and wastage.

The implementation of the EMS leads your company to:

- Monitor the energy demand
- Reduce energy costs and consumptions
- Improve energy performance
- Evaluate the installation of high-efficiency technologies
- Reduce the greenhouse gas emissions
- Be identified in the market as an “Energy Saving Company”

4 ENERGY MANAGEMENT SERVICE

COMMIT YOUR ENERGY MANAGEMENT TO OUR EXPERIENCE

M&P supports your company in **every day energy consumption and cost management**, removing inefficiencies and recommending the best technical and management solutions in order to increase the energy efficiency of the system.

The following services can be performed by M&P:

- **Energy Manager Assistance** during his line of duty, offering technical and management support in order to optimize your company consumptions and costs.
- **Energy Management Service** for the company without an own Energy Manager dedicated to the achievement of goals and improvement of services.

5 ENGINEERING SERVICES

EXPERIENCE OUR SERVICES

All over the world M&P proposes to its customer **energy saving solutions** in industrial, tertiary and PA sectors.

In particular M&P offers the following services in construction, civil and plant sector:

- Preliminary and detail design
- Works supervision
- Safety Coordinator during Design and Executive phases
- Local and regional practices
- Fire safety

6 INDEPENDENT ANALYSIS AND MONITORING

CERTIFY YOUR SAVING SOLUTIONS

M&P offers the **implementation of your energy saving monitoring system** and allows you to evaluate the distribution of your consumption before and after the implementations.

M&P validates as an independent operator the energy saving implementations proposed by EPC Contractor and ESCO, always securing the interest of the customer.

7 INCENTIVES REQUEST

ASK FOR OUR SUPPORT

M&P assists you during the feed-in tariff request, in compliance with current regulations, related to energy saving solutions.

According to "D.M. 28/12/2012", M&P supports you during the **Energy Efficiency Certificates request and validation process**.

M&P proceeds on your behalf for all the fulfillments during the whole period, related to the types of technologies:

- Standard method
- Analytic method
- Final method

CHECK UP YOUR PLANT

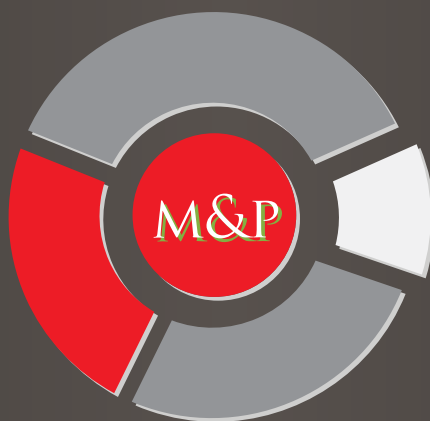

INDUSTRIAL APPLICATION

MORONI & PARTNERS

M&P CHECK UP YOUR PLANT

Based on our experience gained from servicing plants for a global capacity of more than One Gigawatt and thanks to our ongoing research on new solutions tailored to stakeholders in the renewable energy sector, we have developed a new service called “Check Up Your Plant”.

“Check up your plant” is an innovative service that allows, with the help of a periodic analysis and monitoring systems, to recommend energy efficiency solutions and to provide “Technical advisory” services supporting the company during the ISO 50001 certification process.
